

Welbee-P452E

Highest performance for entry into the professional world of pulse welding

- Continuously variable welding inverter for MIG/MAG pulse arc welding
- Rated output current range: 30-450 A
- Excellent welding characteristics for mild steel, stainless steel
- Robust 4-roll wire feeder (encoder regulated)
- Customizable LCD Panel
- Higher Power with an upper limit of wire feeding speed from 18 to 22m/min
- Artificial Intelligence (AI) controlled smart pulse process

Specification

Type	WB-P452E
Rated input voltage	400 V
Primary power max.	23,3 kVA / 19,9KW
Rated output current range	30-450A
Rated output voltage range	12-34 V
No-load voltage	80 V
No-load power consumption	84 W
Duty cycle 40°C 60%/100%	60% / 450 A
Protection class	IP23
External dimensions (WxDxH)	395mm x 710mm x 592mm
Mass	62Kg
Starting method	-
