

VARMIG 301-i LCD Pulse

Compact welding machine with excellent pulse welding performance.

- Simple adjustment of the arc width
- Easy correction of the welding tension
- 2T or 4T welding configuration
- Adjustable gas post-flow
- High-performance cycle for carefree welding all day long

The LCD SCREEN allows for more precise monitoring of welding settings and quick verification of parameters during welding.

SMART SUPPORT for adjusting parameters. The VARMIG welding machine automatically suggests parameters based on the thickness of the welded material.

MMA welding functions:

- Anti-Stick
- Adjustable hot start
- VRD function
- Adjustable Arc-Force

Product information

Order No.	224026032
Model No.	0

Specification

Type	WARM 301-i LCD-Pulse (MIG/ MAG)
Rated input voltage	3 x 400 ± 10%
Primary power max.	11,7 kVA/ 9,7 kW
Rated output current range	50 - 300 A
Duty cycle 40°C 60%/100%	60% / 300 A
